

INFORMATION⁴ALL

Barrier-free information access

Only every second citizen has unrestricted access to information

Speech Code - the new data code in Universal Design makes information accessible for all.

- To read or to listen to - comfortably via the own smartphone
- For users free of charge - always and everywhere
- Free App for Android & iPhone
- OFFLINE without Internet access - guaranteed data privacy
- With individual speed of speech, font size and contrast
- Audible help to find and scan codes with the patented ScanGuidance
- Intuitive navigation and easy connection to links and phone numbers
- Target group oriented information - multilingual and space-saving

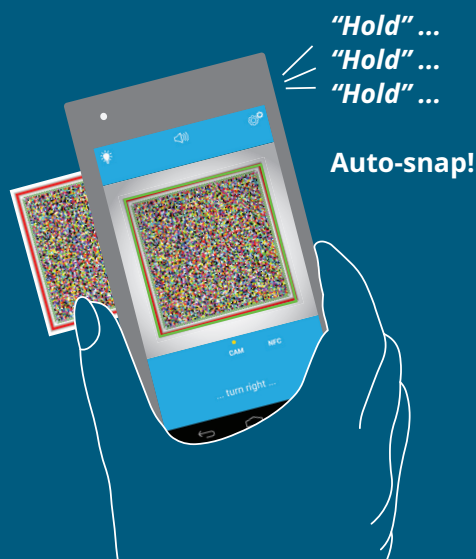

Fields of Application

- Citizen and patient information
- Audible orientation instructions in buildings and on signage
- Package insert leaflets and product information
- Instructions for use and safety information
- Audio Info for tourists at points of interest
- Public transportation
- Menus and programmes
- PIN-protected emergency passes
- Websites and collateral material
- and many more

Do-It-Yourself Code Production

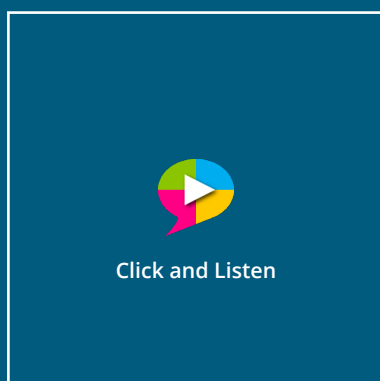

- Easy text entry with the online Speech Generator
- Possibility to create flexible, target group oriented texts in 25+ languages
- Very small space requirement for detailed information (1:40 versus print)
- Up to 40 minutes of speech output per code
- Code production as print, sticker, re-writable NFC Speech Tag or as Speech Link on websites

Easy Information Access

- Download free App "Speech Code" from GooglePlay or iTunes Stores
- Load free voice packages
- Optical scan with audible help or data transfer via NFC - always OFFLINE
- Reading out starts automatically, the text is shown on the display
- Scanned codes are saved in the app and can be retrieved any time
